SHIATSU

60 mins £200

Shiatsu is Japanese for finger pressure. The treatment involves applying pressure on the meridians (which are energetic channels that run through the body) and working on the musculoskeletal system. The treatments awaken the body's potential to heal itself. Shiatsu works on a deep and superficial level. Deep work induces a meditative state that encourages relaxation and reduces the effects of long-term stress, whilst superficial work focuses on stretching and relaxing muscles, freeing up joints and realigning the spine. Regular sessions make a real difference to quality of life as well as preserving wellbeing and enhancing daily performance.

CRANIOSACRAL THERAPY

The treatment allows the body to release its restrictive patterns and produces a deep sense of relaxation and wellbeing.

REFLEXOLOGY

An ancient art of healing which has been practiced for over five thousand years.
