

SHORTLIST

Dear readers,

Although this year is far from over, all of us have already experienced several highs and lows. It is therefore with great pleasure that we present this latest version of our wine list to you as we enter a new phase for our restaurant. Despite it being the fourth edition, a great deal of work and thought has gone into the creation of this 'Shortlist', in order to give you an exceptional wine experience. High quality wines that excite and invigorate have been selected from all over the world and are combined in this list. This edition should also whet your palate and bring you closer to the wines and their histories. In the past one-and-a-half years we have received a great deal of positive feedback from you, the diners. You've discovered new wines, rediscovered old favourites, and one or two of you have even taken a copy of the Shortlist with you to read at home.

We are also delighted about the awards that the Fritz and Felix Shortlist and the Wintergarten Wine List have won in recent months. At the German Wine List Awards, we were honoured by Vinum, one of the most important wine magazines. Wine lists from all over Germany were submitted for this prize and the jury consisting of recognised sommeliers selected the Shortlist among the best wine lists in Germany. Only a matter of days ago we received news of another award that is regarded as the highest international distinction for wine lists: the Wine Spectator Award. It is awarded once a year to the best wine lists in the world. Thousands of restaurants submit their wine lists to the Wine Spectator, one of the most widely read wine magazines, but only a few manage to pass the stringent selection process. At present, there are fewer than 20 German restaurants among the winners. And we are now one of them.

These awards are indeed flattering, but knowing that you, the diners, are happy with the wines on the list and the service we provide is nevertheless our ultimate

We have selected exciting wines from all over the world.

concern. Our wine list of course would not be possible without the support of the winemakers who are currently working hard in the vineyards to maximise the quality of their wines. The work conducted in the vineyards in the summer months is particularly decisive as to whether the grapes pressed in the autumn will produce a great or just an average wine.

Three wines that I would like to bring to the fore in this issue come from wine estates where nothing but the very best quality is bottled. The first is the **2014 Ostertag Muenchberg Grand Cru Riesling** from the neighbouring Alsace wine region. I have hardly come across another Riesling packed with so much suspense as this one. The second is the **2019 Secret de Léoube Édition Oetker Collection** which comes from one of the best rosé producers in the Provence: Albert Mann, where biodynamic working methods have been in place for more than a decade. The third is the rich **2016 Clos Mogador** from Spain's Priorat region, one of the world's most well-known red wines and a reputation it thoroughly deserves.

I do hope you'll enjoy the read and, more importantly, enjoy drinking the wines, too.

Champagne

Champagne is served at every celebration of note. Even the popping of the cork is like the starting gun to begin celebrating. Coco Chanel drank it when she was in love, and also when she was not. My philosophy, though, is that it should be kept for the particularly good moments in life. *Champagne!*

Rosé Champagne

Did you know that two of the three grape varieties used for champagne are red? The wines have a strawberry and raspberry scent and are richer and more abundant.

Sparkling and Semi-sparkling Wine

Carbon dioxide makes sparkling wines what they are. Simply a by-product of breathing to some, these molecules breathe new life into wines, exhilarate us and make life that much more fun. Nowadays, excellent sparkling and semi-sparkling wines can be found all over the world. Here, we have put together a collection from Germany, France and Italy. The difference between sparkling and semi-sparkling wines is mainly due to the pressure in the bottle. Semi-sparkling wines have less than 2.5 bar of pressure while sparkling wines must have over 3 bar. That's more pressure than in a car tire so do take care when the cork's being popped!

Raumland Riesling Brut Rheinhessen 8 / 49

712, This rosé cuvée made from Cabernet Franc and Grolleau grapes is a classic from the Loire region bringing with it exceptional quality for this price.

Riesling

No other grape stands for German wine quite like this one. Treasured by wine drinkers on every continent, it even produced the most expensive wine in the world 100 years ago. Today, it still ranks among the white grape varieties of the highest quality even though it trails behind the wines from Bordeaux and Burgundy somewhat in price. I have tasted Rieslings throughout the world but nowhere does this grape feel more at home than in Germany. If you would like to know more about Rieslings, turn to the article of page 15 and delve into the history of this fascinating grape variety.

Weißburgunder (Pinot Blanc)

Weißburgunder, also known as Pinot Blanc, is Grauburgunder's sibling. While Grauburgunder has coloured skin, the Weißburgunder grape is very light. Getting the best out of the grape has proven difficult for many. Not for the following winemakers, however.

2019 Knewitz Gutswein Rheinhessen

Chardonnay

If there's one grape variety that can outstrip Riesling of its 'king of the white wines' title then it's Chardonnay. And for many years now, great wines have been pressed from this grape variety in the New World – from America to Australia.

Domaine Leflaive

This small winery in Burgundy enjoys a history that dates back to 1717. In the 20th century, the family-run estate worked its way to the wine world's top tier and the Chardonnays from Domaine Leflaive rank among France's most coveted wines. Following environmentally friendly working practices wherever possible has been important to the family for some time, hence the Leflaive's being credited as being pioneers of biodynamic viticulture in Burgundy.

The most famous of the Domaine Leflaive vineyards are to be found in the Côte de Beaune surrounding the Le Montrachet appellation. All neighbouring plots also have the name 'Montrachet' in their designation. One could almost say that this part of Burgundy represents the hub of the Chardonnay world as no other area produces such superb, high-quality wines from this grape variety as here.

Cuvées and other white grape varieties

There are thousands of grape varieties in the world so not all can be given their own heading. But that doesn't mean that they are any less special. Those who have a glass of fresh Grüner Veltliner or a fantastic Albarino to accompany their seafood know exactly what I'm talking about.

Domaine de la Romanée-Conti

If the world of wine had to agree upon one wine estate that represented the pinnacle of quality, then it would quite possibly be Domaine de la Romanée-Conti. Among connoisseurs, the winery is abbreviated to DRC, three letters that carry a great deal of weight. The Domaine lies in the sleepy commune of Vosne-Romanée, close to some of the best vineyard sites in Burgundy. DRC's eight Grand Cru vineyards are cultivated biologically and with great attention to detail. When I was there last, I even observed them using horses in the vineyards to preserve the ground. From the 2014 vintage, we have received a charge from all of the Domaine's Grand Cru vineyards. We must however point out that upon the instructions of the Domaine we are unfortunately unable to allow any bottles or corks to leave our restaurant's premises.

Rosé

Rosé continues to be in vogue – no question about it. Simply considered for many years as a by-product of the red wine process, rosés have made great strides in terms of quality in the past couple of decades. Today, the wines are therefore more distinct and more demanding than before. They are no longer simply terrace wines but can now accompany food and are wines with depth and complexity.

Orange wine

Orange wines are currently one of the most hotly discussed styles of wine in the world. They are white wines that are allowed to stay in contact with the grape skins. Sometimes, the colour of the wine changes to a more or less discreet orange due to this process. The aromas and taste always change. The aromas and tannins contained in the grape skins change the wine into something totally new. This technique has been practiced in some regions for hundreds of years but is currently being well received in the mainstream wine world, enriching it with an additional style.

Riesling Rules!

Wine enthusiasts have their own unofficial list of the world's best grape varieties. In the red wine column of the list, the top two spots are occupied by Pinot Noir and Cabernet Sauvignon, something that is largely undisputed. It's only then that the discussions begin as to the ranking of the rest. With regard to white wine grape varieties there are also two vine types at the top. One of them is Chardonnay, the world-famous grape variety that is grown practically all over the world. The second may come as a surprise to some. It is in fact Riesling.

Riesling is also grown in numerous regions around the world but nowhere else is it more at home than here in Germany. It is assumed that Riesling originated from the Rhine valley as historical records from the 15th century from the Rheingau and Mosel wine regions show. The grape variety was highly valued within society and occupied prime vineyard sites. The fact that the grape matures extremely well in the bottle must have also been known to the winegrowers back then. Today, there are still mature Rieslings stored in Bremen's town hall that date back to 1653.

From very early on there have been estates in Germany that have specialised in Riesling. The historic Schloss Johannisberg has been producing Rieslings exclusively since 1720, such as the **2016 Schloss Johannisberg Gelblack** on this list. According to legend,

the Spätlese was 'invented' there in 1775. Due to the messenger being delayed in obtaining the harvesting permit from the Bishop of Fulda, botrytis bunch rot had already begun to infect the grapes by the time they were harvested and processed. No one thought that good wine could be made from the shrivelled fruit. The resulting sweet wine delighted everyone who tried it and a new quality category was born due to the late harvesting mistake.

Unlike almost any other grape variety, Riesling is renowned for being extremely versatile. Light, dry estate wines, rich Beerenauslese wines and ice wines have been produced for hundreds of years from its lively sparkling wine. The best dessert wines are particularly good at surviving for decades and rank among the most sought-after wines in the world. Not long ago this was plain for all to see when a bottle of the **2003 Scharzhofberger Riesling Trockenbeerenauslese** from Egon Müller was sold at auction for €12,000 and, in doing so, set the record for the most expensive bottle of white wine.

Today, approximately 50% of all Riesling vineyards are to be found in Germany. Riesling is the most important white grape variety in the majority of the German wine regions. The Rhine valley with its Rheingau and Mittelrhein wine regions is where the majority of Riesling production takes place, along with the Mosel region with

its lengthy Riesling tradition. Here where we are in the Baden wine region, Riesling played a secondary role to the widely spread Burgundy grapes. Nevertheless, the Ortenau district that surrounds Baden-Baden is renowned for its Riesling wines.

The residual granite and gneiss soils of the Ortenau district produce rich and intensive Rieslings that also go by the name of Klingelbergers in this area. This synonym for Riesling comes from a Riesling plantation that belonged to Margrave Carl Friedrich of Baden at his Schloss Staufenberg wine estate. The wine produced from this vineyard soon became renowned and the seedlings from these vines were sold throughout the region. Today, there are still numerous excellent winegrowers here who are committed to this grape variety. The **2013 Schloss Neuweier Riesling Mauerwein Großes Gewächs** from this Shortlist comes from the traditional Schloss Neuweier estate, while the **2015 Sven Nieger Riesling Unbestechlich** is vinified by newcomer Sven Nieger. Both wines demonstrate the Ortenau's potential for producing excellent Rieslings.

Pinot Noir

Pinot Noir or Spätburgunder is one of the world's most influential grape varieties. It is not only directly related to Weißburgunder and Grauburgunder, but is also a parent to a large number of grape varieties that have in the meantime become established. Great Pinot Noirs are hard to beat when it comes to intensity, complexity and longevity. Burgundy is viewed as the birthplace of Pinot Noir but nowadays Germany too produces some of this grape variety's best wines.

Half bottles

Is the bottle half full or half empty? I'll leave the answer to you. There are, however, always occasions when you should reach for the smaller format. You can enjoy more wines with your food, or you can begin with the small bottle in preparation of the larger version, or sometimes it's simply necessary to do things by halves.

Other nations too produce some great dessert wines, hence you will also find below a selection from France. We've got fresh, Spätlese wines, rich Auslese wines and concentrated Sélection de Grains Nobles wines. Besides these, you can choose whether you wish to round off the evening with a Riesling that has a nose of apricots and pineapple or with a flowery and opulent Gewürztraminer.
